- Maximizing Quality & Productivity
- Shared Workspaces
- Information Flow

Advanced Topics

- Resource & Portfolio Management
- Agile Contracting
- Distributed Delivery
- Agile Engineering
- Metrics and Reporting
- Others as Requested and Prioritized by the Class

This two-day ScrumMaster certification course provides everything you need to begin leading or participating in a Scrum team. On completion, participants are registered as Certified ScrumMasters (CSMs), which includes a one-year membership in the Scrum Alliance, (www.scrumalliance.org) where valuable materials and information are available exclusively to CSMs.

You will learn the essential concepts and tools of Scrum, differences between agile processes and traditional "waterfall" methodologies, and how to build a roadmap for adopting Agile at your organization. Participants will learn how to lead development teams towards agile operations by: managing product backlogs, planning releases and sprints, tracking and reporting progress, and conducting retrospectives. This course is taught by leading Agile practitioners with decades of real-world industry experience at companies ranging from small businesses to the Fortune 100. Exercises, demonstrations, facilitated discussions, case studies, tool and template examples and more are interwoven throughout the course to illustrate the principles being taught in a comprehensive fashion interactively tailored to each class's particular needs.

Bonus Offerings

- ▶ 16 PDUs towards PMI continuing certification
- ▶ Discount on **Managing Agile Projects** book (and teaching by the author!)
- ▶ Printed Certificate
- ▶ Follow up consulting assistance
