

# AGILE PROJECT LEADERSHIP

## 2 Day Training Course

**£1100 + VAT**

**Manchester, UK**  
**4th - 5th February 2008**

### **Course Overview**

Agile methods like DSDM, eXtreme Programming and Scrum have been proven to deliver business value by accelerating project delivery, increasing customer and employee satisfaction and providing flexibility to changes in business requirements. This practical course covers the basics of agile project leadership and is taught by agile leadership experts who are actual practitioners.

## AGILE PROJECT LEADERSHIP (2 DAY)

Agile methods like DSDM, eXtreme Programming and Scrum have been proven to deliver business value by accelerating project delivery, increasing customer and employee satisfaction and providing flexibility to changes in business requirements. But how do you effectively lead and manage high performing agile teams with skilled team members in the midst of high pressure deadlines, demanding customers and ever-changing business conditions? This course is designed to be a practical introduction to agile methods and to the management of agile projects. It provides delegates with an opportunity to learn agile techniques in a collaborative environment from two of the foremost agile speakers in the industry.

### Course Objectives

*This course will enable delegates to:*

- Plan, estimate, track and report work on agile projects
- Align agile methods with existing practices
- Introduce agile methods into an organisation
- Lead agile teams in collaboration and rapid value delivery

### Who Should Attend

*Those likely to be involved in Agile projects, including:*

- Project Managers
- Business Managers
- Team Leaders
- Product Owners
- IT Managers/Directors
- Business Analysts
